Court Rule No. 2003-47

I'm under the understanding that the Michigan Supreme Court is attempting to make new laws and disregard other laws and procedures that are now in effect.

If this is the case they should consider a new policy of electing the Judges instead of having them appointed. They seem to be forgetting the fact that they are to be interpreting laws not making them.

Please, No changes to the asbestos laws, we that are suffering because of manufactures that "JUST DON'T CARE" need the backing and an understanding court system.

Respectfully:

Howard Skillman
